Waushara County

LAND RECORDS MODERNIZATION PLAN
2010-2015

Prepared by:
The Waushara County Land Information Office
with assistance from
East Central Wisconsin Regional Planning Commission
And Headwaters Resources

I. EXECUTIVE SUMMARY

A. Plan designer

Mike Abitz (County LIO)
Waushara County

Phone: (920) 787-6586
Fax: (920) 787-0425
E-Mail: mikea.courthouse@co.waushara.wi.us

B. Participants in the Plan Preparation

This plan was prepared by the Waushara County Land Information Council with the assistance of the East Central Wisconsin Regional Planning Commission and Headwaters Resources.

Waushara County Board of Supervisors members of the Land Records Committee include:

Joseph Piechowski, Chairman
Everett Eckstein, Vice Chairman
Mike Leikness, Secretary

Ad Hoc members include:

Barb Struzynski	Register of Deeds/Real Property Lister	920-787-0444 barb.courthouse@co.waushara.wi.us
Terri Dopp-Paukstat	Zoning and Land Conservation	920-787-4453 terri.courthouse@co.waushara.wi.us
Scott Schumann	Parks & Solid Waste Director	920-787-7037 wcparks@centurytel.net
Janet Schumacher	Land Records Technician	920-787-6587 jan.courthouse@co.waushara.wi.us
Mike Abitz	Land Information Officer	920-787-6586 mikea.courthouse@co.waushara.wi.us
Mike Moe	County Surveyor	920-787-0459 mikem.courthouse@co.waushara.wi.us
Lynn Boening	Emergency Government	920-787-6571 lynnb.sheriff@co.waushara.wi.us
Trish Nau	East Central Regional Planning	920-751-4770 tnau@eastcentralrpc.org
Larry Timm	County Realtor	ltimm@pitnet.net
Elaine Wedell	County Treasurer	920-787-0445 elaine.courthouse@co.waushara.wi.us
Norm Bushor	Headwaters Resources	715-453-0026 nbushor@headwatersresources.com

C. Summary of the Plan

Waushara County is submitting this *Land Records Modernization Plan* for review and adoption. The focus of this plan is to define land record modernization goals and objectives for the next five years. This Plan will define Waushara County's goals and objectives, report the progress of its current activities, and describe new initiatives that it would like to undertake. It will also describe: who maintains land records within the county; how the county has completed or plans to complete the individual foundational elements of modernization; how the county will comply with state-wide standards; and how the county plans to integrate and share this information.

D. County Land Information Web Site: http://www.co.waushara.wi.us/

E. Municipal Land Information Web Sites: None

II. LAND INFORMATION MODERNIZATION AND INTEGRATION PLAN

A. Goals and Objectives

The primary goal of the County Land Information program is to acquire, implement and maintain a Land Information System (LIS) that will meet the needs of the public and private sectors, as well as its users within the county and other governmental entities in a timely and cost effective manor.

- **Goal**: Continue to develop and deploy an integrated land information system.

Objectives	***Status***
Maintain a Master Address Guide	On going
Obtain new ortho photography on a five year cycle	2010
Maintain land records databases on GCS System	On going
Provide Wireless 911	On going
Convert data design of GIS layers to Geodatabase	On going
Update and maintain Public Land Survey System (PLSS)	On going
Expand 4' contour coverage and consider 2' contour coverage in developed areas	2010

- **Goal**: Coordinate modernization activities with other land records agencies.

Objectives	***Status***
Work with DNR to obtain updated digital wetlands	2010
Work with DNR to obtain update land cover dataset	Completed 2006
Work with ECWRPC to share in existing datasets and development of new datasets	On going
Work with local municipalities to enhance the GIS program to meet municipal needs	On going
Work with FEMA / DNR on the creation of new floodplain maps	Completed 2008
Tie sheet index creation	2012-2015

- **Goal**: Improve data accuracy and reliability.

Objectives	***Status***
Transform existing GIS data to GPS coordinate locations	On going
Complete Metadata for datasets	On going
Improve Land Owner Notification System	On going
Improve Sanitary Application for Track Systems..inventory and mandatory program maintenance	On going
Improve Zoning Application to Track permits and violations	On going
Work with local assessors to develop digital file sharing	On going
Work with Surveyor to get County BM's and descriptions available online.	2015
Provide flood plain data online	2015

- **Goal**: Improve cost-effectiveness.

Objectives	***Status***
Improve tools on County Web site to allow users to complete there own requests	On going

- **Goal**: Improve access to information for users.:

Objectives	***Status***
Enhance existing Online Mapping System	Annual
Enhance existing Tax Inquiry System	As Needed
Provide more access to information in Register of Deeds Office	2011
Provide more access to information in Zoning Office	2011
Provide online hardcopy (pdf) Zoning Maps	2011-2012
Create publication tools and environments that promote easy data sharing and larger data access	On going
Enhance existing website for file downloads of free data	2011-2014
Create web site for Tie sheet publication	2015
Create website for Plat of Survey publication	2015

- **Goal**: Education of public and private sector about the benefits of the County Program

Objectives	***Status***
Provide Training Workshops on new applications	As Needed
Participate in State and Local programs	Annual

1. **Keys to Achieving Goals:**
   - The county will ensure that the information is readily translatable for use by any state or local county/agency or public utility. Data is maintained using non-proprietary software, which ensures that data can be readily translatable.
   - The county will ensure that the information is easily retrievable by any state or local county/agency or public utility. Data will be retrievable through several mediums such as public terminals, the World Wide Web, CD-ROMs and other appropriate technology.
   - The county will ensure that the information is geographically referenced for use by any state or local, county or public utility. The County data will be geographically referenced using the standard coordinate systems that will ensure that the data can be easily shared.
   - The time line for implementation of the goals in this Plan are dependent on the continuation of the Wisconsin Land Information Program's (WLIP) grant program and the amount of retained fees collected.

2. **Database Design**:
   - The County's geographic system is designed to support the existing systems implemented by the County.
   - The database design for land records information conforms to existing county standards, which allows for integration. The county will migrate to Geodatabase technology to reduce redundancy and improve efficiency and reliability. All spatial data are topologically structured and designed to integrate back to the county's database design. Most GIS datasets are documented with compliant metadata.
   - County Network: The County has a Windows network and a series of Windows based servers which host the County Tax, Land, Financial, Zoning, Register of Deeds and Imaging systems. The Land Records program utilizes ESRI products.

B. Progress Report on Ongoing Activities

See Goals and Objectives above. The progress has been updated in the status column.

C. New Initiatives

1. **Proposed Projects**:

   See Goals and Objectives above.

2. **Assistance Requested**

   a) *Technical Assistance*: The LIO List Server provides good insight, and ESRI on-line training helps with GIS-related projects.
   b) *Finances*: The County plans to use retained fees and WLIP grant dollars to fund the activities. The County will continue to pursue other funding (ex: grants, tax levy).
   c) *Strategy*: The county has and maintains land information on its web site as both data and mapping.
   d) *Repository*: The county will participate in the statewide GIS respository.
   e) *Procurement*: The Land Information Office has and will continue to follow county policy for procurement.

3. **Problems Encountered:** Waushara County has strong interest in completing these initiatives as soon as possible; staffing and limited funding affect the overall timing and implementation. To respond to this issue, the County will need to define each project along with its budget to obtain support.

D. Custodial Responsibilities (§ = State Statute, * = County Ordinance)

1. <u>Land Information Officer/Land Records Technician</u>
   a) Current Land Records responsibility and duties
      (1) Coordinates land information projects within the county (§59.88)
      (2) Prepares the Countywide Plan for land records modernization.
      (3) Oversees the LIS/GIS portion of the countywide computer network and data processing.
      (4) Maintains a countywide layering scheme for all mapped entities.
      (5) Maps and maintains all digital parcel maps.
      (6) Works on special projects for individual departments, municipalities, agencies, and the public and private sector.
      (7) Oversees the integrity of maps and corresponding land records data submitted or created for use in the countywide GIS/LIS program.
      (8) Budgets and oversees grants for use in land records modernization efforts.
      (9) Maintains County IMS site.
      (10)Maintenance of digital land use and zoning maps.
      (11)Maintenance of digital shoreland, floodplain, and recreation maps.
      (12)Maintain hard copy parcel maps, including property divisions, splits, and merges.
      (13)Assigns new parcel identification numbers (PIN) to parcels.
      (14)Maintain or oversee maintenance of digital parcel maps.

   b) Future Land Records responsibilities and duties (expected or willing to assume).
      (1) Educating users in the creation of maps and the use of GIS.
      (2) Program user interfaces for data entry and GIS queries.

2. <u>Register of Deeds/Real Property Lister</u>
   a) Current Land Records responsibility and duties

(1) *Records and stores deeds, mortgages, plats, and associated land records (§59.21) and maintains its corresponding database.*
(2) *Maintains a computerized tract index and grantor/grantee index. (§59.21)*
(3) *Maintains a database of description and ownership information on all parcels. (§70.09)*
(4) *Maintain database information on school and other special district codes.*
(5) *Maintains computer services for assessment roll, notice of assessments, summary reports, tax roll, and tax billing.*
(6) *Responsibility for the use and management of a document imaging system.*

3. County Clerk

a) Current Land Records responsibility and duties
(1) *Maintains hard copy electoral and jurisdictional maps. (§5-10)*
(2) *Maintains highway and road relocation orders. (§32.05 84.09)*
(3) *Maintain a state trunk highway system map. (§84.02)*

b) Future Land Records responsibilities and duties (expected or willing to assume)
(1) *Maintenance and review of digital electoral and jurisdictional maps upon creation.*

4. Emergency Management

a) Current Land Records responsibility and duties.
(1) *Maintains E911 System.*
(2) *Maintains uniform property address system.*
(3) *Maintains uniform road naming system.*
(4) *Maintains records on hazardous chemical storage. (§323.20)*
(5) *Maintains records on prior chemical spills. (§323.215)*
(6) *Maintains records on emergency evacuation sites. (§323.09)*
(7) *Maintains records on damages to public and private properties. (§323.22)*
(8) *Maintains records on pipelines.*
(9) *Maintains current records of emergency response districts.*

b) Future Land Records responsibilities and duties (expected or willing to assume).
(1) *Create and maintain digital hazardous chemical storage and spills maps.*
(2) *Create and maintain digital emergency evacuation site maps.*
(3) *Create and maintain digital disaster area maps.*
(4) *Create and maintain digital emergency response district maps.*
(5) *Maintenance of digital address and rural numbering maps.*
(6) *Maintain E911Datasets.*

5. County Surveyor

a) Current Land Records responsibility and duties
(1) *Maintains information on PLSS corners. (§59.49)*
(2) *Maintains information on the High Accuracy Network (HARN) densification in the county.*
(3) *Maintains private and certified survey maps (CSM) as provided to its office.*
(4) *Oversee all monument maintenance activities.*
(5) *Scans and maintains documents related to survey records.*

b) Future Land Records responsibilities and duties (expected or willing to assume)
(1) *Maintain a countywide database and GIS of PLSS section corners.*

6. Zoning Department

a) Current Land Records responsibility and duties
   (1) Maintain zoning and land use maps as approved by unincorporated municipalities. (§59.69)
   (2) Maintain shoreland and floodplain zoning. (§59.69)
   (3) Review land division in the form of plat and CSM reviews. (§59.69)
   (4) Enforces county zoning and building ordinances. (§59.69)
   (5) *Administration of farmland preservation plans and zoning*

<u>Land Conservation Department</u>

a) Current Land Records responsibility and duties *(Chapter 92 §)*
   (1) Prepare land and water resource management plan. (§92.10)
   (2) Maintains natural resource data including field by field soil erosion data for "T" by 2000 program (§92.025)
   (3) Maintains digital and hard copy watershed maps.
   (4) Maintains conservation plans for land owners.
   (5) Maintains and monitors Farmland Preservation Program conservation plans. (§92.104)
   (6) Maintain CREP mapping database

8. Highway Department

a) Current Land Records responsibility and duties

(1) Maintains a filing system for right-of-way design and as-built plans.
*(2) Maintain control access regulations filing system. (§83.027)**
(3) Maintains a sign inventory.
(4) Maintains a seven year road project, maintenance, and improvement database.
(5) Maintains utility and driveway inspection records.

b) Future Land Records responsibilities and duties (expected or willing to assume)

(1) Request all road and highway design and as-built plans in digital form, for digital filing.
(2) Create and maintain a GIS and database of controlled access ROW areas.
(3) Utilize a countywide road database for vehicle routing and road maintenance records.
(4) Create and maintain an automated utility and driveway inspection system.
(5) Create a road sign database and inventory for use in tracking maintenance.
(6) Create a culverts database and inventory for use in tracking maintenance.

9. Clerk of Courts

a) Current Land Records responsibility and duties

(1) Maintains a database of civil judgements and small claims on individuals and property (§799.09).
(2) Maintains a database of state tax and construction liens on persons or roperties.(§75.521, 806.16)
(3) Maintains a database of bankruptcy actions and sheriff sales.(§806.19, 842.28, 812.16)

10. Probate

a) Current Land Records responsibility and duties

(1) Maintains a database of probate records. (§851)
(2) Maintains a database of guardianship records. (§880)

11. Treasurer

a) Current Land Records Responsibility and duties

(1) Collection of general property taxes (§74.07)
(2) Preparation of acquiring and sale of tax delinquent properties.
(3) Work with Real Property Lister on tax billing

b) Future Land Records responsibilities and duties (expected or willing to assume)

(1) Coordinate with Real Property Lister on maintenance of tax parcel maps.

12. Sheriff

a) Current Land Records responsibility and duties

(1) Maintain Master Street Address Guide (MSAG).
(2) Quality check / verify E911 addressing database.
(3) Quality check/verify road ranges and address points for correct attributation of E911 fields.

b) Future Land Records responsibilities and duties (expected or willing to assume)

(1) Wireless E911.
(2) Incident Mapping.
(3) Create cell tower feature class layer with zones for E911 location.

13. Human Services

a) Current Land Records responsibility and duties

(1) Maintain databases to be geo-coded.

b) Future Land Records responsibilities and duties (expected or willing to assume)

(1) Mapping of Services.

14. Health

a) Current Land Records responsibility and duties

(1) Maintain databases to be geo-coded.

b) Future Land Records responsibilities and duties (expected or willing to assume)
   (1) Incident Mapping.
   (2) Mapping of Services.

E. Framework Data, System Implementaion and Statewide Standards.

1. Geographic Positioning Reference Framework

a) **Geodetic Control Network:** The County has completed densification of the High Accuracy Reference Network (HARN) to the tertiary level using GPS and the Wisconsin Department of Transportation standards. The county will be responsible for maintenance of the HARN Densification.

b) **Public Land Survey System:** The County has completed 100% of the remonumentation and geodetic control of the Public Land Survey System (PLSS) for section and quarter section corners. This work meets the requirements established in state statutes and meets at least second order class II standards. The County also has a maintenance program where 5% of the corners are inspected each year, thus all corners will be checked at least once every twenty years.

2. Orthoimagery and Georeferenced Image Base Data

a) **Photogrammetric Base Maps:** The County has digital raster graphics of the USGS 7.5 Minute Topographic maps and a series of images that are available for use in a digital format which are in State Plane South coordinates. The dates that are available are: 1992, 2000, 2005 and 2010.
b) **Digital Orthophoto (DOP):** The County has a series of images that are available for use in a digital format which are in State Plane South coordinates. The dates that are available are: 1992, 2000, 2005 and 2010. The County has established a five year cycle for acquisition of new ortho-photography (2005,2010, etc).
c) **Digital Raster graphics:** USGS 7.5 Minute Topographic maps
d) **Satellite Imagery**: None
e) **Oblique Aerial Imagery**: None
f) **Historical Aerial imagery**: The county has available 1992, 2000 and 2005. 1937, 1957 and 1964 are also available scanned and orthorectified by ECWRPC. ECWRPC has scanned 1970 and 1980 but not ortho images.

3. Elevation Data Products and Topographic Base Data.

a) **Digital Elevation Models:** A DEM was created for the 39 sections along for STH 21 contour project.
b) **Digital Terrain Models:** None
c) **Triangulated Irregular Networks:** The County has not purchased TIN products.
d) **Contours:** The County has 4 foot contours established for the 39 sections along the STH 21 corridor.
e) **LIDAR:** Highway 21 corridor in 2005. Additional 73.74 sq. miles in the center of the County in 2010.
f) **IFSAR Data:** None

4. Parcel Mapping

a) **Refer Boundaries**: The County has completed the digital parcel mapping for the entire county. The parcel mapping is referenced to the Public Land Survey System (PLSS). The method of parcel mapping is by ArcGIS editing tools and board digitizing.
b) **Do Not Refer Boundaries**: None
c) **Coordinate System Used**: State Plane Coordinate System, South Zone, NAD83-91
d) **Parcel ID:** The county parcel ID numbering system partially conforms to the WLIB parcel numbering system standards.

5. Parcel Administration and Assessment Information

a) **Design:** The County has developed a parcel administration design that has property records and boundary information including the PIN referenced to the PLSS.

b) **Activities**: With the primary PIN, links can be established back to the Tax, Land, Zoning and Register of Deeds systems. Links can also be established by site address and owner name. The county has a document imaging system that will allow links back to actual copies of recorded documents

6. Street/Road Centerlines, Address Ranges and Address Points

a) **Transportation Network**: The County has a complete transportation network.
b) **Right-of-Way**: Right-of-way areas were mapped during parcel conversion.
c) **Centerlines**: The County has mapped all centerlines for the county and met local standards.
d) **Address Ranges**: Data acquisition is complete in 2010 and maintenance is ongoing.
e) **Site Address Database**: Data acquisition is complete and maintenance is ongoing.
f) **Address Point / Driveway**: Data acquisition is in progress.
g) **Road Names**: Road names have been assigned to the centerline file.
h) **Functional Class**: Functional classes have been assigned to the centerline file.
i) **Places/Landmarks**: None
j) **MSAG**: Centerline/Addresses match the County MSAG and local standards
k) **Emergency Planning**: Data acquisition is in progress.
l) **Wireless 911**: The geographic framework exists to support Wireless 911; however until the technology is implemented is not fully known if all the data is currently present.

7. Hydrography, Hydrology and Wetlands Mapping
a) **Hydrography**: Complete from planimatric mapping and DNR data.
b) **Watersheds**: Digital layer on file
c) **Hydrogeology: None**
d) **Impacts on Environment: None**
e) **Wetlands Mapping:** 1994 DNR Digital Layer on file

8. Soils Mapping, Land Cover and other Natural Resource Data

a) **Soils mapping activities:** Obtain any new soils data through the NRCS Soilsmart and web survey
b) **Land Cover**: Obtain from WIDNR.
c) **Forests**: Obtain from WIDNR.
d) **Geology**: Obtain from the Wisconsin Geologic Society and NRCS.
e) **Hydrogeology**: Completed by WNHGS.
f) **Non-Metallic Mining**: Data acquisition is in progress.
g) **Endangered Resources**: Not complete; however we have some data from the DNR.
h) **Impact on Environment**: The County does have a data base of well test showing water testing results.

9. Land Use Mapping

a) **Land Use**: The County worked with East Central Wisconsin Regional Planning Commisssion to have the land use mapped in 2003. The County utilizes the DOR Land Use Classification System within its assessment tool database. The land use assessment evaluations and corresponding acreage are determined by the municipal assessors, and maintained by the Real Property Lister.
b) **Future Land Use**: Future land use is not completed for the entire county; however the County has applied for a grant to complete a County Wide Smart Growth Plan which was adopted in December 2009.

10. Zoning Mapping

a) **Zoning Districts:** Zoning districts are mapped for all areas that have some type of zoning.

b) **Shorelands**: Shoreland zoning districts have been mapped per the regulations; however County does not have all the navigable waterways defined. Will be photographing and placing GPS points on all shorelands as a possible project.
c) **Floodplains**: Detailed floodplain studies have been prepared for the Pine River, Willow Creek, Lake Poygan and Lower Pine and Fox River Areas. Floodplains have been digitized off of the FEMA maps and certified by FEMA.
d) **Environmental corridors**: None
e) **Burial Sites**: Acquired from Wisconsin Historical Society.
f) **Archeological Sites**: Acquired from Wisconsin Historical Society.
g) Historical/Cultural Sites: Acquired from Wisconsin Historical Society.

11. Reconciled Election and Administrative Boundary System

The county has acquired the appropriate layers for: Election Districts, TIF Districts, Public Administered Lands, some Lake Districts, Zip Codes, Census Geographies, School Districts, Legislative Districts, Minor Civil Divisions and County Boundaries. These layers have come from various sources. The county does not have layers for: Utility Districts, Native American Lands and State Outline.

12. Critical Infrastructure and Facility Management

a) **Emergency service districts:** Data acquisition is complete and maintenance is ongoing. Mapped through the All-Hazards Mitigation Plan, ECWRPC.
b) **911 call centers:** Data acquisition is complete and maintenance is ongoing. Mapped through the All-Hazards Mitigation Plan, ECWRPC.
c) **Fire/Police districts:** Data acquisition is complete and maintenance is ongoing. Mapped through the All-Hazards Mitigation Plan, ECWRPC.
d) **Fire/Police stations:** Data acquisition is complete and maintenance is ongoing. Mapped through the All-Hazards Mitigation Plan, ECWRPC.
e) **Hospital facilities:** Data acquisition is complete and maintenance is ongoing. Mapped through the All-Hazards Mitigation Plan, ECWRPC.
f) **Government facilities:** Data acquisition is complete and maintenance is ongoing. Mapped through the All-Hazards Mitigation Plan, ECWRPC.
g) **Utilities:** Mapped through the All-Hazards Mitigation Plan, ECWRPC.
h) **Parks & Recreational Trails:** the County maintains a digital GIS dataset of County Parks
i) **Transit systems: None**
j) **Bridges, culverts, traffic road signs:** tabular datasets maintained by Highway Department
k) **Airports:** mapped within the parcel GIS Dataset
l) **Harbors: None**
m) **Boat landings:** Mapped through the Open Space Plan Update, April 2006. Complied by Parks Dept. and maintained by County.
n) **Hazardous materials sites:** the County maintains a digital GIS dataset for the sites
o) **Landfills:** the County maintains a digital GIS dataset of landfills

13. Data Base Design and System Implementation

a) **Design Evaluation**: Waushara County currently maintains several land information related databases on a Windows Network. The primary databases are on the Windows Network SQL Server. The County GIS system database is designed to integrate with these systems.
b) **Project Approach**: The County does not have any plans to redesign its existing database structure on the Windows network. We are changing our existing GIS data sets to match the latest technology (geodatabase).
c) **Timeline**: NA
d) **Metadata**: Metadata exists for the County GIS datasets; however more documentation is needed to allow further integration with the Windows Network system databases.
e) **Security/Privacy**: Security is maintained by the Information Services Department. The County does not have a specific privacy polices except those required by state and federal law.
f) **Implementation**: The County does not have any plans to redesign its existing database structure. The primary focus is on integrating these existing datasets together.
g) **Quality**: Each system is designed to maintain security and accuracy.

h) **Needs Assessment**: The County has a Land Records Committee which looks at existing and future needs.
i) **Format**: New datasets are designed to fit into the existing data architecture.
j) **Data Model**: Not completed for the County, but with continued growth a comprehensive date model is planned for the future.
k) **Dictionary**: The County does not have a data dictionary.
l) **Coding Schema**: New datasets are designed to fit into the existing data architecture.
m) **Transaction**: The County tracks transactions with our financial system.
n) **Flow**: As the County implements new datasets, the County establishs flows to ensure that those datasets can be maintained.
o) **Conversion**: All of the County existing data is in an 'open format' which allows for easy conversion.
p) **Integration**: By following data standards and maintaining the County's data in an 'open format', the County allows for existing and future development of system integration.

F. Public Access

a)Access: The County is currently using several methods to provide access to customers. These methods include: Internet access to the *GIS Online Mapping System*, Internet Access to the *County Tax Inquiry System*, Public Terminals for research, CD Subscription access for recorded documents and daily counter access.
b) 3rd party technologies: None.
c) **Data Sharing Policies**: The County has policies that govern data sharing and data fees.
d) **Open Access to Data**: See 5.a. above.
e) Subscription: County has public-facing web services and subscription-based for access to County programs
f) Customized data: None
g) **Internet Access**: See 5.a. above.
h) **System Security**: The County does have the appropriate security installed to protect its systems.
i) **Privacy Policies**: The County does not have specific privacy policies except those regulated by state or federal law.
j) **Designated fees**: County uses the $1 fee for land information data

G. Integration and Cooperation

a) Formal data sharing: Per County contract as needed
b) Maintenance agreements: None
c) Cooperative agreements: Per County contract as needed

d) Consortia: WROC 2010 Ortho project.
e) Collaborative arrangements: None
f) Statutory relationships: None

1. What integrative/cooperative relationships would your county like to develop?

The county would like to develop more data and cost sharing agreement between itself and other public or private entities. The county would pursue integrative and cooperative arrangements with any agency or department that would promote efficiency, utility, compatibility, and/or savings for the parties involved. The Land Records Committee and Land Use Planning Committee have informal data sharing agreements and a progressive history of data sharing with cooperators including the DNR, NRCS and East Central Wisconsin Regional Planning Commission.

2. What potential partners and mutual projects does your county plan to pursue?

The county would like to expand the scope of such local and neighboring agreements by entering into agreements with larger regional entities such as regional utilities, the Department of Natural Resources (DNR), and the Department of Transportation (DOT).

3. What data would be shared and used in both of the above?

The county will continue to freely share data with its municipalities and neighboring counties regarding parcel, centerline, and municipal boundary issues; but would also like to pursue other large-scale efforts. In addition, the county would like to work closer with local utilities, phone companies and emergency services to create a digital addressing system.

H. Communication, Education, Training and Facilitated Technical Assistance

a) **Data Documentation**: The County has developed METADATA for it existing datasets.
b) **Resources Available**: The County does not have a formal training center.
c) **Customer Needs**: Needs from internal and external customers are based on user demand and technology changes.
d) **Training**: Training will be provided both internally through the LIO and externally as needed and as funds exist.
e) **Clearinghouse/Repository**: Use of LIO list server
f) **Technology Use:** The technology is used to help train the users and public on the program.
g) **Education Funds**: The training and education dollars obtain through the Program have been used to send staff to WLIA events.

I. Administrative Standards Not Associated With Foundational Elements

1. The County agrees to observe and follow the statutes relating to the Wisconsin Land Information Program and other relevant statutes.

2.The County agrees to permit the Wisconsin Land Information Board access to books, records and projects for inspection and audit including unannounced audits by the Board until it sunsets.

3. The County agrees to complete the Annual WLIP Survey should the program continue.

4. The County agrees to update the plan every 5 years should the program continue.

5. Development and implementation of an acceptable Plan confers certain benefits on local government within a County, including continued eligibility for Program funding. A self-approving peer review process will be used to assess Plan acceptability by the land information community.
